Habin Rahman

Mangalore, India • habin936@gmail.com• +91 9742704702 • linkedin.com/in/habinrahman • github.com/habinrahman

Motivated and detail-oriented Backend Software Engineer with hands-on experience in developing scalable backend systems and RESTful APIs using Python (FastAPI), Java (Spring Boot), and SQL. Strong foundation in object-oriented programming, databases, and cloud deployment. Skilled in building secure, reliable services and integrating modern tools like Docker, Supabase, and AWS. Passionate about designing efficient architectures.

Education

NMAM Institute of Technology — Nitte, Karkala, India
Master of Computer Application — 2024-2026

Sri Ramakrishna College — Mangalore, India
Bachelor of Computer Application. — 2020 –2023

Technical Skills

Languages: Python, Java, JavaScript, SQL, HTML, CSS
Frameworks & Tools: FastAPI, Flask, Spring Boot, React, Node.js, Bootstrap
Databases: MySQL, MongoDB, Supabase (PostgreSQL)
Cloud & DevOps: Docker, AWS (EC2, S3), Git, GitHub, Postman
Concepts: OOP, REST API design, JWT Authentication, Distributed Systems (basic), Data Structures & Algorithms

Experience

MicroDegree — Mangalore, India

Software Development Intern — Jun 2025 – Present

Tech Stack: SQL, React, Node.js, Python

- Collaborated with the engineering team to develop and maintain backend modules using **FastAPI** and **Node.js**.
- Integrated **SQL databases** for data handling, optimized queries, and built secure REST APIs.
- Worked on API testing, debugging, and code review cycles in an agile environment.
- Improved system reliability and deployment workflows using **Docker** and version control with **Git/GitHub**.

Projects

1. **Certificate Verification Web App with QR Code Integration**
   Technologies: FastAPI, Supabase, HTML/CSS, JavaScript
   - Built a web backend to verify certificates dynamically using **Supabase PostgreSQL**.
   - Implemented **QR code generation**, **PDF download**, and **admin dashboard**.
   - Configured **CORS support**, **Supabase integration**, and **error handling** for smooth API responses.
   - Developed both **Flask** and **FastAPI** versions for comparison and scalability testing.

2. **Food Delivery Backend System (Java, Spring Boot, MySQL, JWT)**
   - Developed a fully functional backend system for a food delivery platform with **JWT authentication**, **role-based access**, and **CRUD APIs**.
   - Implemented **order tracking**, **delivery assignment**, and **cart management** features.
   - Integrated **Docker** for containerization and designed an **AWS deployment guide**.
   - Created detailed **Postman collections** for API testing and documentation.

3. **Image Intruder Detector – Real-Time Desktop Surveillance System**
   Technologies: Python, OpenCV, SMTP2GO, Tkinter
   - Built real-time face detection security system with instant email alerts.
   - Implemented Tkinter GUI for control and monitoring.
   - Built academic project demonstrating Python programming, QA testing, and troubleshooting.
   - Features: face detection, logging, email alerts, GUI monitoring.

4. **Sweet Galore – Online Sweet Ordering System**
   Technologies: HTML, CSS, JavaScript, PHP, MySQL
   - Developed responsive e-commerce platform for sweet orders.
   - Integrated secure payment gateway and order tracking.
   - Designed MySQL schema for order, user, and inventory management.

5. **Automation Scripts & Tools Technologies: Python, SQL, Render**
   - Created Python scripts for database cleanup and migration.
   - Developed SQL queries for analytics and data integrity checks

Certifications

- Cybersecurity Job Simulation – Mastercard & Forage
- Software Engineering Job Simulation – Accenture & Forage
- Getting Started with Flutter & Dart – Packt, via Coursera
- Basics of Machine Learning Algorithms – UniAthena & Cambridge International Qualifications (UK)
- Executive Diploma in Business Communication – UniAthena
- MongoDB Basics – MongoDB University
- Basics of Python – UniAthena & Cambridge International Qualifications (UK)
- Introduction to Critical Infrastructure Protection – OPSWAT Academy

Technical Workshops & Hands-On Training

- Cloud Deployment – Render, Vercel
- Database as a Service (DBaaS) – Supabase
- Containerization & API Testing – Docker, Postman

Additional information:

- Familiar with distributed systems, event-driven architecture concepts, and cloud platforms (AWS, Kafka basics).
- Strong analytical and debugging skills; able to work independently and in team settings.
- Open to relocation and hybrid opportunities.

Soft Skills:

Cross-cultural adaptability - Strong technical foundation - Problem-solving and critical thinking - Proactive and self-motivated

Languages:

English, Hindi, Kannada, Arabic

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge.
