Habin Rahman

Mangalore, India • habin936@gmail.com• +91 9742704702 • linkedin.com/in/habinrahman • github.com/habinrahman

Full-Stack Software Engineer skilled in building scalable web applications using React, Node.js, Python (FastAPI/Flask), and PostgreSQL. Experienced in RESTful API development, JWT authentication, and cloud-based deployments with Docker and AWS. Passionate about developing impactful digital solutions. Born and raised in Bahrain, currently based in India, available to relocate by December 20.

Education

NMAM Institute of Technology — Nitte, Karkala, India
Master of Computer Application — 2024-2026

Sri Ramakrishna College — Mangalore, India
Bachelor of Computer Application. — 2020 –2023

Technical Skills

- **Frontend: React.js, Bootstrap, HTML5, CSS3, JavaScript**
- **Backend: Node.js, FastAPI, Flask, Spring Boot, Java**
- **Databases: PostgreSQL, MySQL, MongoDB**
- **Cloud & DevOps: Docker, AWS (Basics), Git/GitHub**
- **Other Tools: Postman, Supabase, Retool (Familiar)**

Experience

MicroDegree — Mangalore, India

Software Development Intern — Jun 2025 – Present
Tech Stack: SQL, React, Node.js, Python, java

- Built and optimized full-stack applications integrating **React front-end** with **REST APIs** using **Node.js/FastAPI**.
- Collaborated on database design and optimization using **SQL and PostgreSQL**.
- Worked on code modularization, error handling, and API documentation for production-ready deployment.
- Contributed to a certificate verification system using **Supabase backend** and **FastAPI** with QR code integration.

Projects

1. **Certificate Verification Web App with QR Code Integration**
   https://certificate.microdegree.in/
   Technologies: FastAPI, Supabase, HTML/CSS, JavaScript
   - Built a web backend to verify certificates dynamically using **Supabase PostgreSQL**.
   - Implemented **QR code generation**, **PDF download**, and **admin dashboard**.
   - Configured **CORS support**, **Supabase integration**, and **error handling** for smooth API responses.
   - Developed both **Flask** and **FastAPI** versions for comparison and scalability testing.

2. **Food Delivery Backend System (Java, Spring Boot, MySQL, JWT)**
   - Built a complete backend architecture with **role-based authentication** (Admin, User, Delivery).
   - Designed **CRUD APIs** for users, restaurants, and orders.
   - Implemented **order tracking**, **payment**, and **cart functionality** using Spring JPA/Hibernate.
   - Integrated **Docker** for containerization and AWS deployment support.
   - Included **Postman collection** for API testing and documentation.

3. **Image Intruder Detector – Real-Time Desktop Surveillance System**

Technologies: Python, OpenCV, SMTP2GO, Tkinter

- Built real-time face detection security system with instant email alerts.
- Implemented Tkinter GUI for control and monitoring.
- Built academic project demonstrating Python programming, QA testing, and troubleshooting.
- Features: face detection, logging, email alerts, GUI monitoring.

4. **Sweet Galore – Online Sweet Ordering System**
   Technologies: HTML, CSS, JavaScript, PHP, MySQL
   - Developed responsive e-commerce platform for sweet orders.
   - Integrated secure payment gateway and order tracking.
   - Designed MySQL schema for order, user, and inventory management.

5. **Automation Scripts & Tools Technologies: Python, SQL, Render**
   - Created Python scripts for database cleanup and migration.
   - Developed SQL queries for analytics and data integrity checks

Certifications

- **Introduction to Critical Infrastructure Protection** – OPSWAT Academy
- **Computer Architecture & Organization Masterclass** – Udemy
- **Getting Started with Flutter & Dart** – Coursera
- **MongoDB Basics** – MongoDB University

Additional information:

- Interests: Traveling, Exploring Software Systems
- Available to relocate as required
- **Nationality: Indian (Bahrain-born)**

Soft Skills:

Teamwork | Problem Solving | Analytical Thinking | Agile & Time Management | Adaptability

Languages:

English, Arabic
